

YOUR DREAM OUR PASSION

TASKS

APP DEVELOPMENT INTERNSHIP TASKS

CodeAlpha offers internship opportunities in App Development, providing you with an exceptional opportunity to gain hands-on experience in the field of mobile application development. Our program is designed to nurture your talent by offering practical exposure, mentorship, and the chance to work on real-world app development projects.

TASK 1

ONLINE BOOK STORE

Consider creating an online bookstore Android application as a challenging and engaging project for college students. It offers the convenience of 24/7 shopping, making it a time and money-saving solution for students dealing with extensive reading lists.

TASK 2

COLLEGE ALERT APPLICATION

Create a College Alert Android app that notifies users about campus events. It's a beginner-friendly project that utilizes Android features. This app benefits busy students by helping them plan their schedules and stay informed about crucial campus events.

TASK 3

ONLINE EXAM APPLICATION

Develop an Online Exam Application for administering exams to a large number of people simultaneously, ideal for educators. The user-friendly interface supports various question types like multiple choice, essay, and short answer, simplifying the exam creation process.

TASK 4

E-COMMERCE APPLICATION

Create an advanced mobile-only e-commerce app where registered users can securely buy and sell products. Addressing data security and payment safety is crucial. If executed well, this project has the potential to innovate the e-commerce industry.
